

RE PLACE

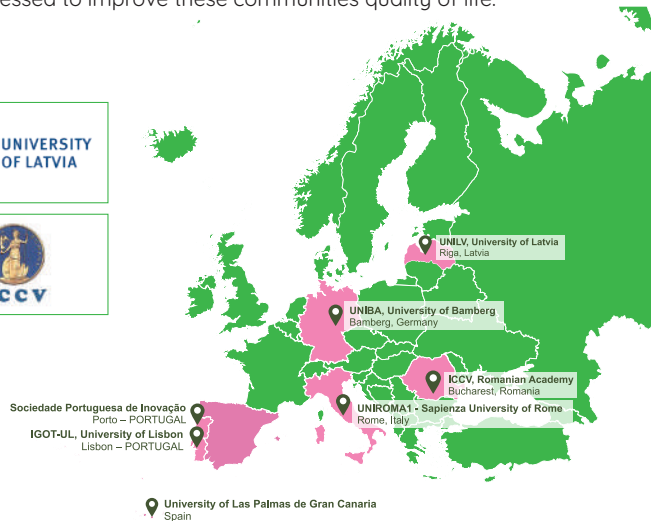

Reframing Non-Metropolitan Left-Behind Places through Mobility and Alternative Development

Re-Place is an Horizon Europe project that aims to improve community quality of life in non-metropolitan areas throughout Europe

Project Background

The Re-Place Project is set to explore the complex issues faced by peripheral non-metropolitan areas which have been the subject of mixed narratives during the COVID-19 pandemic. While some people see these areas as struggling and left behind, others see them as offering a higher quality of life compared to big cities. Through participative research, Re-Place will examine the role that spatial mobilities play in the future of these places, and how it can be harnessed to improve these communities quality of life.

Partner

7 partners from 6 EU countries

Duration

4 years (from March 2023)

Budget

2,9 M€

Coordinator

Institute of Geography and Spatial Planning, University of Lisbon

Project Objectives

- ✓ Develop tools to understand development trajectories in left-behind areas through a tailored human development index and a population survey
- ✓ Scale down to 12 case study areas, in 6 countries, to examine mobility drivers and their impacts through immersive fieldwork
- ✓ Qualitatively examine perceptions and practices of (im)mobility
- ✓ Co-create place-based policies to enhance alternative local development
- ✓ Reinforce a sense of place using co-production and visual methodologies

Expected Outcomes

Expected outcome 1	Expected outcome 2	Expected outcome 3
Analyze the demographic, economic, social and cultural effects of mobility in European countries, from a sending and receiving side	Envisage policies that counter brain drain and labour exploitation phenomena and enhance joint building of human capital across regions and countries	Identify effective policies to promote rural development and sustainability and address regional inequalities
